Re: Pacific Airmotive Corporation - Subsurface
Discharge - Aviation Jet Fuel

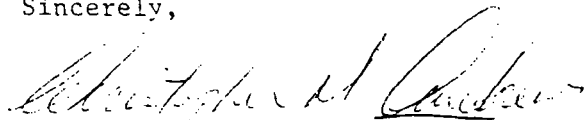

Dear Mr. Workman:

We have received your letter of October 21, 1985, regarding the completed Emergency Cleanup at the PAC test facility.

Per your request, Kennedy/Jenks Engineers have submitted a proposed work plan to determine the vertical extent of the remaining contamination in the N. W. corner of Area II. They have also included a plan to evaluate the rate of migration. A copy of this proposal is attached.

Drilling by Kennedy/Jenks is scheduled for the second week of November, and a final report will be submitted no later than the second week of December, 1985.

Sincerely,

Christopher M. Andrews
